Framework Django, Tailwind & Bootstrap

UI Design :

Figma

CERTIFICATION

- Full Stack Data Analytics by Revou, May 2022
- Introduction to Artificial Intelligence for Business by Skill Academy, Sep 2021
- Learn Machine Learning For Beginners by Dicoding, Jun 2021

SUMMARY

I am very interested in working on matters related to design, analysis, and data. My journey in data started with my first job as a web developer where I became interested in processing and retrieving data in SQL form, and from that data, I was given the task of telling stakeholders how the monthly income is and why it can go up or down and supervising data input. Through self-learn and experience, I manage to pull through but still felt not enough. That's why I decided to join the data analytics course from Revou to deepen my data skills using various tools other than SQL, such as Excel, Python, and Tableau, and also to help shape my framework of thinking of solving business problems.

EXPERIENCE

Web Developer & UI Designer

Salon Muslimah Mumtaza | Feb 2021 - Nov 2021

Salon Muslimah Mumtaza is a subsidiary of PT. PINTAR INOVASI MANDIRI located at Ruko Villa Dago Pamulang which is engaged in the field of care and beauty.

My responsibility is to create a Mumtaza Management System Web to overcome the problem of inappropriate income and expenses from the salon admin by entering data into the system, with this system the data can be monitored and maintained and I create UI design to attract online customers or members. What I did is as follows:

- Web Developer - Create Web Management System Mumtaza to contain the management of financial data, employees, and stock. using HTML & CSS to front-end, PHP for backend, javascript to data validation, and SQL to data process.
- UI Designer by using Figma - Create a user interface & prototype of the online store Mumtaza and create a landing page design to solve difficult promotional problems for members, so this website was made to make it easier for members to access the new website of the Mumtaza salon.

EDUCATION HISTORY

REVOU FULL-STACK DATA ANALYST

Full-Stack Data Analytics (FSDA) Program | Jan - Jun 2022

By joining this program (which only accepts <10% of all applicants), I managed to hone my data skills. Thought and mentored by instructors from Tech Industries such as Gojek, Tokopedia, Julo, XL, etc learned analytical process from :

- defining the business problem,
- data gathering/extraction/manipulation using Spreadsheet, SQL, and Python, and
- visualizing and communicating insights using Tableau

Had committed over 200 hours to online lectures and assignments, and was able to achieve overall grades of 98.72% out of 100%.

PAMULANG UNIVERSITY

Bachelor's Degree in Computer Science | 2016 - 2021

GPA 3.3 out of 4.0
